

InfoPath 2007 Power User Course

Duration: 2 days

This two day course is intended for delegates wishing to be introduced to InfoPath 2007 so that they can create forms from templates and customize them, generate forms from scratch and also from data sources. Publish forms to SharePoint with or without form services, run the design compatibility checker, learn how to apply conditional formatting, calculations and formulas to your forms. Explore the new InfoPath 2007 features.
